complete with white curtain rings

Information concerning the measurements:

All dimensions refer to actual finished size.

In order for the shower curtain not to touch bottom of bath
tub or the floor we recommend the following: Distance
between floor and bottom edge of curtain appr. 30 mm.
Distance between centre of curtain pole and top edge of
curtain appr. 40 mm.

Please allow appr. 1.3 to 1.5 times curtain pole length when
calculating required width of curtain.
